

**Report Description/Data Source**

This report counts admissions and days by group, region, level of care, and age group. All data pulled from VO claims.

## Calculation Formulas:

1. Average Length of Stay: Days/Admissions
2. Admissions/1000 Lives:  $(\text{Admissions}/\text{Avg Covered Lives}) * 1000$
3. Days/1000 Lives:  $(\text{Days}/\text{Avg Covered Lives}) * 1000$
4. Regions are determined using the member's region code at time of service. Members who were not mapped to a valid region at time of service are reported in the "Other" region.
5. Life stage (Adolescent or Adult) is determined by the member's age at the beginning of the admission period. If a 17 year old was admitted to an adult LOC, but turned 18 during the admission period, the member would still be counted as adolescent for the entire admission period.

This report is based upon paid claims data. Quarter 1 data may appear higher as ValueOptions assumed utilization for continuation of admissions occurring prior to July 1<sup>st</sup>. Reviewers are cautioned not to draw conclusions about trends until all of the 4<sup>th</sup> quarter data has been received and posted and substantial claims run out for the additional quarters has occurred (IBNR). Adolescents may be counted in adult or adolescent categories depending upon their date of birth. This report can not be used to determine quality of care or outcomes of care.
