

ValueOptions[®] Presents:

“Improving Outcomes in Opiate Addiction in the Outpatient Setting”

By

Thomas Kosten MD,

JH Waggoner Chair and Professor of Psychiatry, Pharmacology and Neuroscience,
Baylor College of Medicine, Houston, TX

Target audience is primary care physicians, psychiatrists, psychologists and social workers

This activity will discuss appropriate use of pharmacologic treatment, as well as the role of incorporating behavior health care for office-based opioid addiction practices. The goal is for practitioners to incorporate best-practice guidelines for the treatment of substance use disorders in the outpatient setting.

After attending this activity participants will be able to:

1. Explain the role of pharmacologic therapy in the treatment of opioid addiction.
2. Compare pharmacologic treatment implemented in the behavioral care setting vs the primary medical care setting.
3. Discuss factors that improve treatment outcomes in the outpatient setting.
4. Create a comprehensive plan for treating opiate addiction which includes pharmacologic and non-pharmacologic options.
